FUNCTIONS

JAMES & NICHOLSON stands for functional and trendy corporate fashion clothing! **JAMES & NICHOLSON** textiles are manufactured sustainably and with social and ecological responsibility. This brand covers a diverse range of T-shirts, polo shirts and sweatshirts made of cotton or cotton blend and jackets in up to 40 colours, as well as functional sportswear-shirts for almost all sports. This selection is perfectly completed by professional workwear, as well as even more functional business wear. Moreover, **JAMES & NICHOLSON** offers a lot of articles in special sizes for women and men- also in outsizes up to 5XL. We have over 20,000 items in stock. An average stock availability of 97% enables us to respond very quickly. The products can be individualized with imprint or embroidery according to customer specifications. The corresponding decoration capacities inhouse guarantee a flexible and quick completion.

With **JAMES & NICHOLSON** service is a major issue - the customer is the focus of our daily business. Therefore, the quality of the product lines is the most important thing. All the textiles are REACH-compliant and are manufactured in accordance with Oeko-Tex® standard 100. Since 1999 social and environmental aspects within global intertwining of markets have been all part of the code of conduct.

JAMES & NICHOLSON
QUALITY - RESPECTFULLY MADE ON EARTH!

coldblack®
Textiles with a coldblack®-finish afford optimum protection against heating up through sun rays. They stay cooler and protect reliably against UV rays (min UPF 30). The effect of this is that the person wearing these garments does not sweat so easily, feels better and is even more efficient. coldblack® is a registered trademark of Schoeller Technologies AG, Switzerland (patent pending).

UV-Protection
Textiles with the symbol UV-protection are characterized by sun protection comparable to the protection of a sun-screen. The information is given in UPF (UV-protection factor). This indication implies the factor by which the length of time spent in the sun can be extended without getting sunburnt. It is calculated in the same way as the sun protection factor of a sun-screen.

CoolDry®
Due to the CoolDry® finish moisture is transported to the outside and creates a comfortable feeling. The textiles dry quickly, are breathable and ideal for all activities.

Social Compliance "BSCI"

As members of the 'BSCI/Business Social Compliance Initiative' we commit ourselves to implementing the BSCI code of conduct as part of our business relations with our manufacturers and thus to improving the working conditions within our supply chain and to producing our textiles fairly. This includes our clear commitment to the employees' right to freedom of assembly, protection against discrimination, and an adequate remuneration, that is, at least the statutory national minimum wage. Another central component is the occupational safety regulations. That is how we guarantee that employees do not work more than 48 hours a week and that the occupational safety regulations of the ILO (International Labour Organisation) are met. Child labour, forced labour or precarious jobs are not tolerated.

A 7-member Social Compliance Department in Shanghai and Dhaka tests all the factories thoroughly and makes sure that these conditions are met.

<http://www.bsci-intl.org/>

Oeko-Tex® Standard 100

This standard guarantees that textile and non-textile product components pose no threat to health.

www.oeko-tex.com

Adherence to the REACH-Regulations

We assure you that when manufacturing our myrtle beach caps and **JAMES & NICHOLSON** textiles we meet the obligations of the REACH-Regulations.

Protection of the Environment

All the manufacturing plants of our myrtle beach caps and **JAMES & NICHOLSON** textiles work on the highest environmental level and pursue the principle of sustainability. For example, all the manufacturing plants dispose of a water purification plant.

Quality Standard

The merchandise is regularly tested by certified testing institutes in Quakenbrück and Bangladesh regarding the confirmed parameter. Moreover, in cooperation with SGS, Testex, Hohenstein and other renowned institutes the quality is continually controlled.

THERMO SUBLIMATION

Thermo sublimation for great prints!

Sublimation prints are an amazing way to create bright, long lasting colours with photo realistic qualities. Sublimation ink, when heated, turns into a gas that penetrates and permanently dyes polyester fabric, creating a clean, professional look with a soft touch.

Start-up costs are minimal as processing is performed by an ink jet printer using heat transfer paper. The resulting print is in mirror image and is transferred onto the garment by using a heat press at a specified temperature and pressure. This is a low cost operation suitable for one-offs or production series.
